

As an ISO9001:2000 Registered Company, ARCOL have ensured wherever possible our Company complies with the WEEE Directive 2002/95/EC.

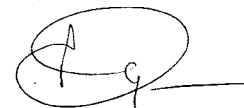

WEEE Directive 2002/96/EC Waste Electrical and Electronic Equipment (WEEE)

The Waste Electrical and Electronic Equipment Directive (WEEE) aims to minimise the impacts of electrical and electronic equipment on the environment during their life times and when they become waste. It applies to a huge spectrum of products. It encourages and sets criteria for the collection, treatment, recycling and recovery of waste electrical and electronic equipment. It makes producers responsible for financing most of these activities (producer responsibility). Private householders are to be able to return WEEE without charge.

Although the directive is aimed primarily at the equipment manufacturers, ARCOL continues working with industry groups to ensure that it will be clear to the Customer how and what methods are in place to recycle our resistors.

This area will be updated as processes are established.

Signed on behalf of ARCOL UK Ltd.

Alun Morgan, Technical Director
